Four Pillars of Bioclues

M - Mentoring

O - Outreach

R - Research

E - Entrepreneurship

Volume#1, Issue #12, July 1, 2010

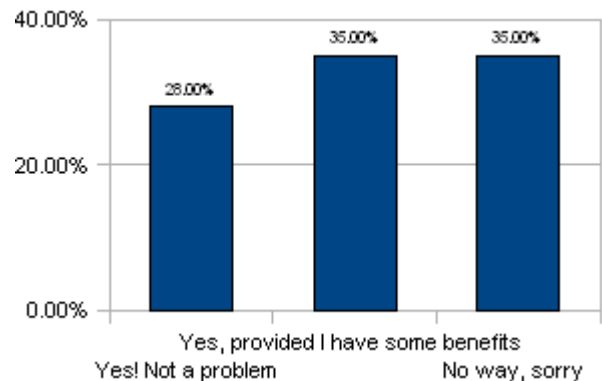

An affiliate of Asia Pacific Bioinformatics Network

Bioclues turns five years!

Bioclues.org celebrates the existence of five virtual years. Ever since it was planned way back in 2005 and later started in 2006, we are privileged to have mentored more than 100 graduate students, mostly falling in the areas of Bioinformatics and Biotechnology. In 2008, Bioclues became an affiliate of *Asia-Pacific Bioinformatics Network (APBioNet.org)*. The main mandates and mission statements of Bioclues are previously discussed and are available in the *mission statement* of the homepage. We request you to encourage student scientists to avail membership in Bioclues which is absolutely free. You will herald to exchange news, posts and have for sure virtual discussion. We have had a privilege of starting five virtual projects and successfully presented them. Besides mentoring and research, we recognized more than 200 scientists from India and abroad.

-Bioclues Executive Team (BET)

Poll results on whether or not the member is interested to pay minimal membership fee in Bioclues?

New Executive/core team from August.....

We're going to have a new BET start August 1, 2010. Please stay tuned for our bulletin release on August 1, 2010.

Want your research to be highlighted?

You are welcome to send us introduction to your research highlights. We will get them reviewed and post it.
